Experience

Concurrences **Remote**

AI Engineer *April 2026 - Present*

- Architected an AI legal research agent from 0 to 1 for Europe's premier antitrust law publisher, enabling automated search across 100,000+ legal publications and 85+ global jurisdictions for top international law firms and competition authorities.
- Engineered a specialized RAG and multi-agent reasoning pipeline tailored for complex EU and global competition law, eliminating hallucinations and increasing key legal citation extraction accuracy.
- Designed custom evaluation rubrics and production-grade API architecture, scaling legal LLM prototypes into an enterprise AI agent serving corporate legal teams and international regulatory experts.

Triad Markets **Remote**

Software Engineer *January 2026 - April 2026*

- Architected scalable, high-throughput Solana liquidity infrastructure for the largest prediction market in Latin America, supporting $10M+ USD in cumulative volume.
- Engineered automated high-frequency trading (HFT) algorithms utilizing the Black-Scholes volatility pricing model; executed 1,000+ daily transactions with real-time risk control protocols.
- Designed and deployed a suite of automated Python liquidity bots with integrated CI/CD, maintaining 99.9% uptime and stable market depth for over $10M in transaction volume on the Solana network.

LISS Legal Intelligence **Remote**

Software Engineer *August 2023 - January 2026*

- Reduced manual document processing by 53% by designing an automated legal analysis engine using LangChain and LLM APIs to parse unstructured case data at scale.
- Built resilient Python scraping solutions (Selenium, Scrapy) to harvest critical data from judicial portals, bypassing anti-bot measures to ensure high-availability ingestion.

Datanis **São Paulo, Brazil**

Software Engineering Intern *April 2023 – August 2023*

- Engineered and optimized a Delphi REST API for local payment methods (Boleto), ensuring reliable transaction processing for fintech clients.
- Reduced production bugs by 35% by implementing automated unit testing suites and manual validation protocols for legacy financial modules.

Skills

- **Languages:** English (Fluent, Cambridge Certified), Portuguese (Native).
- **Technical:** Python, Go (Golang), SQL, JavaScript; Django, FastAPI, LangChain, React, Next.js; Selenium, Beautiful Soup, Scrapy, PostgreSQL; Docker, AWS, Git, CI/CD Pipelines.

Projects

- **Polymarket Odds Converter – JavaScript, Browser Extension:** Built an open-source extension to enhance trading on Polymarket.com, creating a real-time conversion engine that interacts directly with CLOB data to transform implied probabilities into decimal odds.
- **AI SQL Agent – Python, LangChain, OpenAI API:** Architected a Natural Language Interface to Database (NLIDB) translating user queries into optimized SQL, processing over 600 routine requests per month.

Education

Federal Institute of Science and Technology of São Paulo (IFSP) **Votuporanga, Brazil**

Bachelor of Science in Information Systems *March 2023 - Expected December 2026*
