Experience

LISS Legal Intelligence **Remote**

Software Engineer *August 2023 - February 2026*

- Engineered a legal document analysis system using LangChain and LLM APIs to process thousands of case files. Reduced manual review time by 53% and improved data extraction accuracy for unstructured legal texts.
- Built scraping solutions with Python (Selenium, Scrapy) to harvest critical data from judicial portals. Overcame complex anti-bot measures and dynamic content rendering to ensure high-availability data ingestion for client intelligence reports.
- Architected microservices using FastAPI and Django on a Docker environment. Established CI/CD pipelines that accelerated feature deployment and supported real-time analytics dashboards for legal teams.

Datanis **São Paulo, Brazil**

Software Engineering Intern *April 2023 – August 2023*

- Developed and optimized a Delphi (Pascal) REST API to process local payment methods (Boleto/banking tickets). Ensured seamless transaction flows and data consistency for fintech clients.
- Implemented comprehensive unit testing and manual validation protocols, reducing production bugs by 35% and stabilizing legacy financial modules during peak usage.

Skills

- **Language:** English (Fluent, Cambridge Certified), Portuguese (Native).
- **Technical:** Python, Go (Golang), SQL, JavaScript; Django, FastAPI, LangChain, React, Next.js; Selenium, Beautiful Soup, Scrapy, PostgreSQL; Docker, AWS, Git, CI/CD Pipelines.

Projects

- **AI SQL Agent – Python, LangChain, OpenAI API:** Architected a Natural Language Interface to Database (NLIDB) that translates user queries into optimized SQL, processing over 600 routine requests per month. Reduced the need for non-technical staff to manually write queries, streamlining data retrieval processes.
- **Polymarket Odds Converter – JavaScript, Browser Extension:** Built a Chromium-based extension to enhance trading on Polymarket.com. Engineered a real-time conversion engine that interacts directly with the platform's CLOB data, transforming implied probabilities into decimal odds for active users.
- **Memoryvive – Next.js, SaaS:** Launched a full-stack SaaS platform for professional photo restoration, with over 300 monthly users. Developed a responsive frontend with Next.js to handle high-resolution image uploads and processing workflows.

Education

Federal Institute of Science and Technology of São Paulo (IFSP) **Votuporanga, Brazil**

Bachelor of Science in Information Systems *March 2023 - Expected December 2026*

- Organized the Congress of Technology and Information Systems (COTESI), coordinating technical workshops and lectures for over 500 attendees.
